# Proposed Features

- Allow users to create accounts or log in securely to access the platform's features.
- Enable users to upload files either by dragging and dropping them onto the platform or by browsing their local file system.
- Provide the ability for users to download files they have uploaded or files shared with them.
- Allow users to delete files they have uploaded or files that they own.
- Implement functionality for users to generate shareable links for their files, allowing others to access them publicly.
- Implement granular user permission settings to control who can access, view, edit, or delete files, improving data security and privacy.
- Offer file preview functionality to allow users to preview files before downloading them, enhancing the user experience and reducing the risk of downloading malicious files.
